IGETIOCYLOCHICOME C.
-1-SUBUNIT: BCI COMPLEX CONTAINS 11 SUBUNITS; 3 RESPIRATORY SUBUNITS
(CYTOCHROME B. COMPLEX CONTAINS 11, 2 CORE PROTEINS AND 6 LOW-MOLECULAR WEIGHT PROTEINS.
-1-SUBCELLULAR LOCATION: Mitochondrial inner membrane.
-1-SIMILARITY: BELONGS TO THE UQCRH/QCR6 FAMILY.

Fatent No. 5948640

GENERAL INFORMATION:

APPLICANT: Randazzo, Filippo

TITLE OF INVENTION: Mammalian Additional Sex Combs (Asx) Acts as a Tumor Suppre;

TUTLE OF INVENTION: Mammalian Additional Sex Combs (Asx) Acts as a Tumor Suppre;

NUMBER OF SEQUENCES: 4

CORRESPONDENCE ADDRESS:

ADDRESSEE: Chiron Corporation

STREET: 4560 Horton Street

CITY: Emeryville

STATE: California

COUNTRY: U.S.A.

ZIP: 94608

COMPUTER READABLE FORM:

MEDIUM TYPE: Floppy disk

COMPUTER: IBM PC Compatible

COMPUTER: IBM

Sequence 17, Application US/09397386

Patent No. 6300470

GENERAL INFORMATION:

APPLICANT: Selsted, Michael E.

APPLICANT: Selsted, Machael E.

TITLE OF INVENTION: Antibiotic Cryptdin Peptides and Methods

TITLE OF INVENTION: Of Their Use

NUMBER OF SEQUENCES: 70

CORRESPONDENCE ADDRESS:

ADDRESSEE: Campbell and Flores

STREET: 4370 La Jolla Village Drive, Suite 700

CITY: San Diego

STATE: California

Patent No. 5756668

GENERAL INFORMATION:

APPLICANT: Baylin, Stephen B.

APPLICANT: Wales, Michele M.

TITLE OF INVENTION: NOVEL TUMOR SUPPRESSOR GENE, HIC-1

NUMBER OF SEQUENCES: 14

CORRESPONDENCE ADDRESS:

ADDRESSEE: Fish & Richardson P.C.

STREET: 4225 Executive Square, Suite 1400

CITY: La Jolla

STATE: California

COUNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             seq_documentation_block:
